

PROJECT SEARCH 2016-2017

KPBSD Project SEARCH Intern Newsletter

In this issue:

- End of rotations
- December Calendar
- New Room
- Contact Information

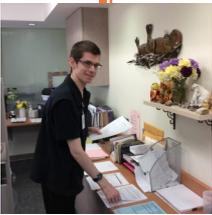

I learned a lot in Maintenance. I learned how to do rounds where I check all of the equipment to see if everything is running at normal levels. I also learned how to make and copy keys which is also my favorite thing to do and I will miss it. Then I learned how to use Siemen's Insight and learned how to change room temperatures within that program. I would recommend this rotation to people who are interested in working on a hands on job and a dry sense of humor. This rotation is good to work on because maintenance is in constant demand no matter what the building is, from a hospital to an airport there will always be something that needs to be maintained.

In Dietary I learned skills I need to prep food for multiple people- patients and community at the same time as well as improving my speed and accuracy while working. I learned good habits while in kitchen like never leaving knife around and washing dishes after I used them. I met a lot of good people who taught me skills I did not already have. Making pizza with Lorenzo was my favorite thing to do. He taught me presentation in my pizza. I will miss working with my mentors and the chefs in the back. I would recommend this rotation to fast moving, level minded people interested in cooking. This rotation showed me how far I could go if I am willing to push myself.

In Day Surgery, my two favorite tasks were stocking and cleaning. I also learned how to make coffee, assemble packets, addresses envelopes, customer service, and making beds. I obtained the skills of staying productive, memorizing job tasks, and not getting distracted by surroundings. I would recommend this rotation to others because the Day Surgery staff are friendly. Once a person learns the skills in this rotation, it is a lot of fun.

In, Laundry I learned how to fold linens correctly and neatly. I used a commercial folding machine and monitored the dryers. I liked hand folding items because I could make them look nicer. I will miss putting the clean laundry into the dryers. Working together as a team was one of my favorite parts of laundry plus, they teach you how to not leave laundry for others, do it yourself. This rotation helped me because I want to work at a laundry mat or in housekeeping.

My favorite thing about working in the Transportation Department was how I was always meeting new people and interacting with different parts of the hospital. While in Transport I learned and improved many valuable skills. The ability to prioritize my objectives, an appropriate sense of urgency, quick concise mathematics, the ability to navigate large complicated structures, as well as plenty of stamina will serve me well in future careers. Overall I'd recommend Transport to any future intern who can appreciate a challenging and active work environment while remaining flexible
